

23. TRENDS IN SMPS DESIGN

NPSS/PELS Joint Chapter College of Engineering Karunagappally, led a 2 day event on the month of April 2019. The event focused on bringing together all the alternative syllogism and speculations of SMPS design. It was aimed to have a healthy thought sharing between the participants and the skilled. Everyone was grouped in the hall and were made to prepare for the topic and present it to a panel of adepts. After the presentations from the participants, the experienced talked about the drawback and correctness of each presentation and they too explained the complete technical side of each design. We received positive feedback from the entrants.
