17 . ITIPS Program

IEEE technical quality improvement programs (ITIPS) was an initiative taken, focusing on the technical enhancement and skill development for students.

As a part of this initiative, we organized workshops on 3D printers at Sree Buddha Central School, with the use of their Atal tinkering lab.

A total of 40 students attended the session in which the basic working of a 3D printer, its components, uses etc. were described and demonstration sessions were conducted to familiarize the entire process.
